USERS' GUIDE

Catalog Arrangement and Indexes

The bibliographic entries in the *Monthly Catalog* are arranged in Superintendent of Documents classification number order. Each record is also assigned a unique catalog number, which consists of a two-digit prefix representing the catalog year, followed by a sequential number beginning with 1 in the first issue of each year. Within this arrangement, the publications of each Government author are further identified by the name and address of the issuing agency.

Catalog entries may be accessed by the following indexes:

Author index: An alphabetical list of personal authors, editors, co-authors, corporate authors, and conferences.

Title index: An alphabetical list of titles proper, subtitles, and alternate titles.

Subject index: An alphabetical list of subjects derived from the *Library of Congress Subject Headings*.

Series/Report index: An alphabetical listing of series statements and tracings, series numbers, and report numbers.

Contract number index: An alphanumeric list of contract, grant, and project numbers associated with technical report publications. Abridged cataloging records are not accessible by contract number.

Stock number index: An alphanumeric list of Superintendent of Documents and other sales stock numbers.

Title keyword index: An alphabetical list of truncated titles, arranged by important words selected from publication titles.

A **margin index** on the back cover locates the seven indexes. Listings in all of the indexes are followed by the catalog entry number, which refers the user to the complete bibliographic citation. Listings in the title and subject indexes are augmented with the publications' author and classification number to enhance identification and retrieval. Cumulative indexes are published semiannually, annually, and quinquennially, and in addition the indexes listed above, include a **Classification number index** for all the publications listed during the period of cumulation.

Abbreviations

The abbreviations used in the bibliographic records in the catalog are those described in the *Anglo-American Cataloguing Rules*, 2nd ed., and the *GPO Classification Manual: A Practical Guide to the Superintendent of Documents Classification System*.

List of Government Authors

This alphabetical list in the preliminary pages of each catalog locates the beginning of the sequence of entries of documents issued by a specific agency. The list is compiled each month and contains only Government authors of documents included in that *Monthly Catalog* issue.

J. 100 22280

The first part of the paper is devoted to a study of the properties of the function $f(x)$ defined by the equation $f(x) = \sum_{n=0}^{\infty} a_n x^n$, where a_n are the coefficients of the power series. It is shown that $f(x)$ is a continuous function of x and that it satisfies the functional equation $f(x) = f(x^2) + x f(x)$. The second part of the paper is devoted to a study of the properties of the function $g(x)$ defined by the equation $g(x) = \sum_{n=0}^{\infty} b_n x^n$, where b_n are the coefficients of the power series. It is shown that $g(x)$ is a continuous function of x and that it satisfies the functional equation $g(x) = g(x^2) + x g(x)$.

The third part of the paper is devoted to a study of the properties of the function $h(x)$ defined by the equation $h(x) = \sum_{n=0}^{\infty} c_n x^n$, where c_n are the coefficients of the power series. It is shown that $h(x)$ is a continuous function of x and that it satisfies the functional equation $h(x) = h(x^2) + x h(x)$.

The fourth part of the paper is devoted to a study of the properties of the function $k(x)$ defined by the equation $k(x) = \sum_{n=0}^{\infty} d_n x^n$, where d_n are the coefficients of the power series. It is shown that $k(x)$ is a continuous function of x and that it satisfies the functional equation $k(x) = k(x^2) + x k(x)$.

The fifth part of the paper is devoted to a study of the properties of the function $l(x)$ defined by the equation $l(x) = \sum_{n=0}^{\infty} e_n x^n$, where e_n are the coefficients of the power series. It is shown that $l(x)$ is a continuous function of x and that it satisfies the functional equation $l(x) = l(x^2) + x l(x)$.

The sixth part of the paper is devoted to a study of the properties of the function $m(x)$ defined by the equation $m(x) = \sum_{n=0}^{\infty} f_n x^n$, where f_n are the coefficients of the power series. It is shown that $m(x)$ is a continuous function of x and that it satisfies the functional equation $m(x) = m(x^2) + x m(x)$.

The seventh part of the paper is devoted to a study of the properties of the function $n(x)$ defined by the equation $n(x) = \sum_{n=0}^{\infty} g_n x^n$, where g_n are the coefficients of the power series. It is shown that $n(x)$ is a continuous function of x and that it satisfies the functional equation $n(x) = n(x^2) + x n(x)$.

The eighth part of the paper is devoted to a study of the properties of the function $o(x)$ defined by the equation $o(x) = \sum_{n=0}^{\infty} h_n x^n$, where h_n are the coefficients of the power series. It is shown that $o(x)$ is a continuous function of x and that it satisfies the functional equation $o(x) = o(x^2) + x o(x)$.

The ninth part of the paper is devoted to a study of the properties of the function $p(x)$ defined by the equation $p(x) = \sum_{n=0}^{\infty} i_n x^n$, where i_n are the coefficients of the power series. It is shown that $p(x)$ is a continuous function of x and that it satisfies the functional equation $p(x) = p(x^2) + x p(x)$.

The tenth part of the paper is devoted to a study of the properties of the function $q(x)$ defined by the equation $q(x) = \sum_{n=0}^{\infty} j_n x^n$, where j_n are the coefficients of the power series. It is shown that $q(x)$ is a continuous function of x and that it satisfies the functional equation $q(x) = q(x^2) + x q(x)$.

The eleventh part of the paper is devoted to a study of the properties of the function $r(x)$ defined by the equation $r(x) = \sum_{n=0}^{\infty} k_n x^n$, where k_n are the coefficients of the power series. It is shown that $r(x)$ is a continuous function of x and that it satisfies the functional equation $r(x) = r(x^2) + x r(x)$.

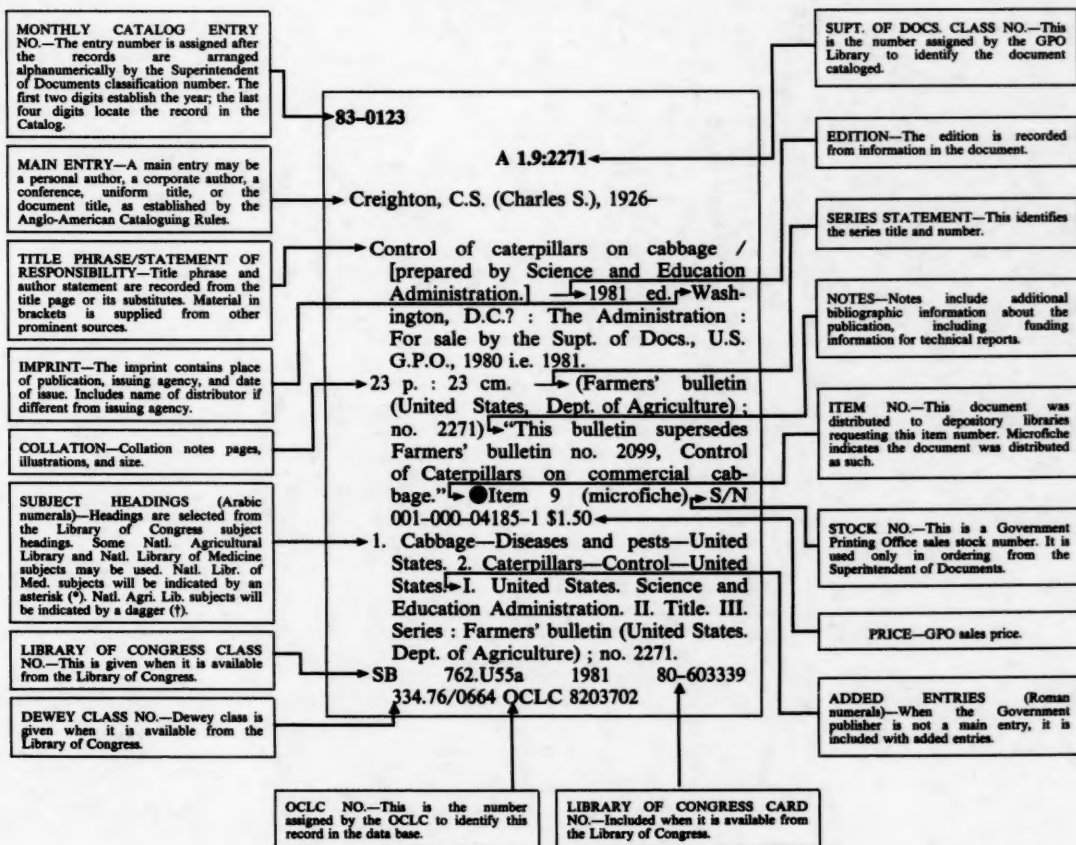

The twelfth part of the paper is devoted to a study of the properties of the function $s(x)$ defined by the equation $s(x) = \sum_{n=0}^{\infty} l_n x^n$, where l_n are the coefficients of the power series. It is shown that $s(x)$ is a continuous function of x and that it satisfies the functional equation $s(x) = s(x^2) + x s(x)$.

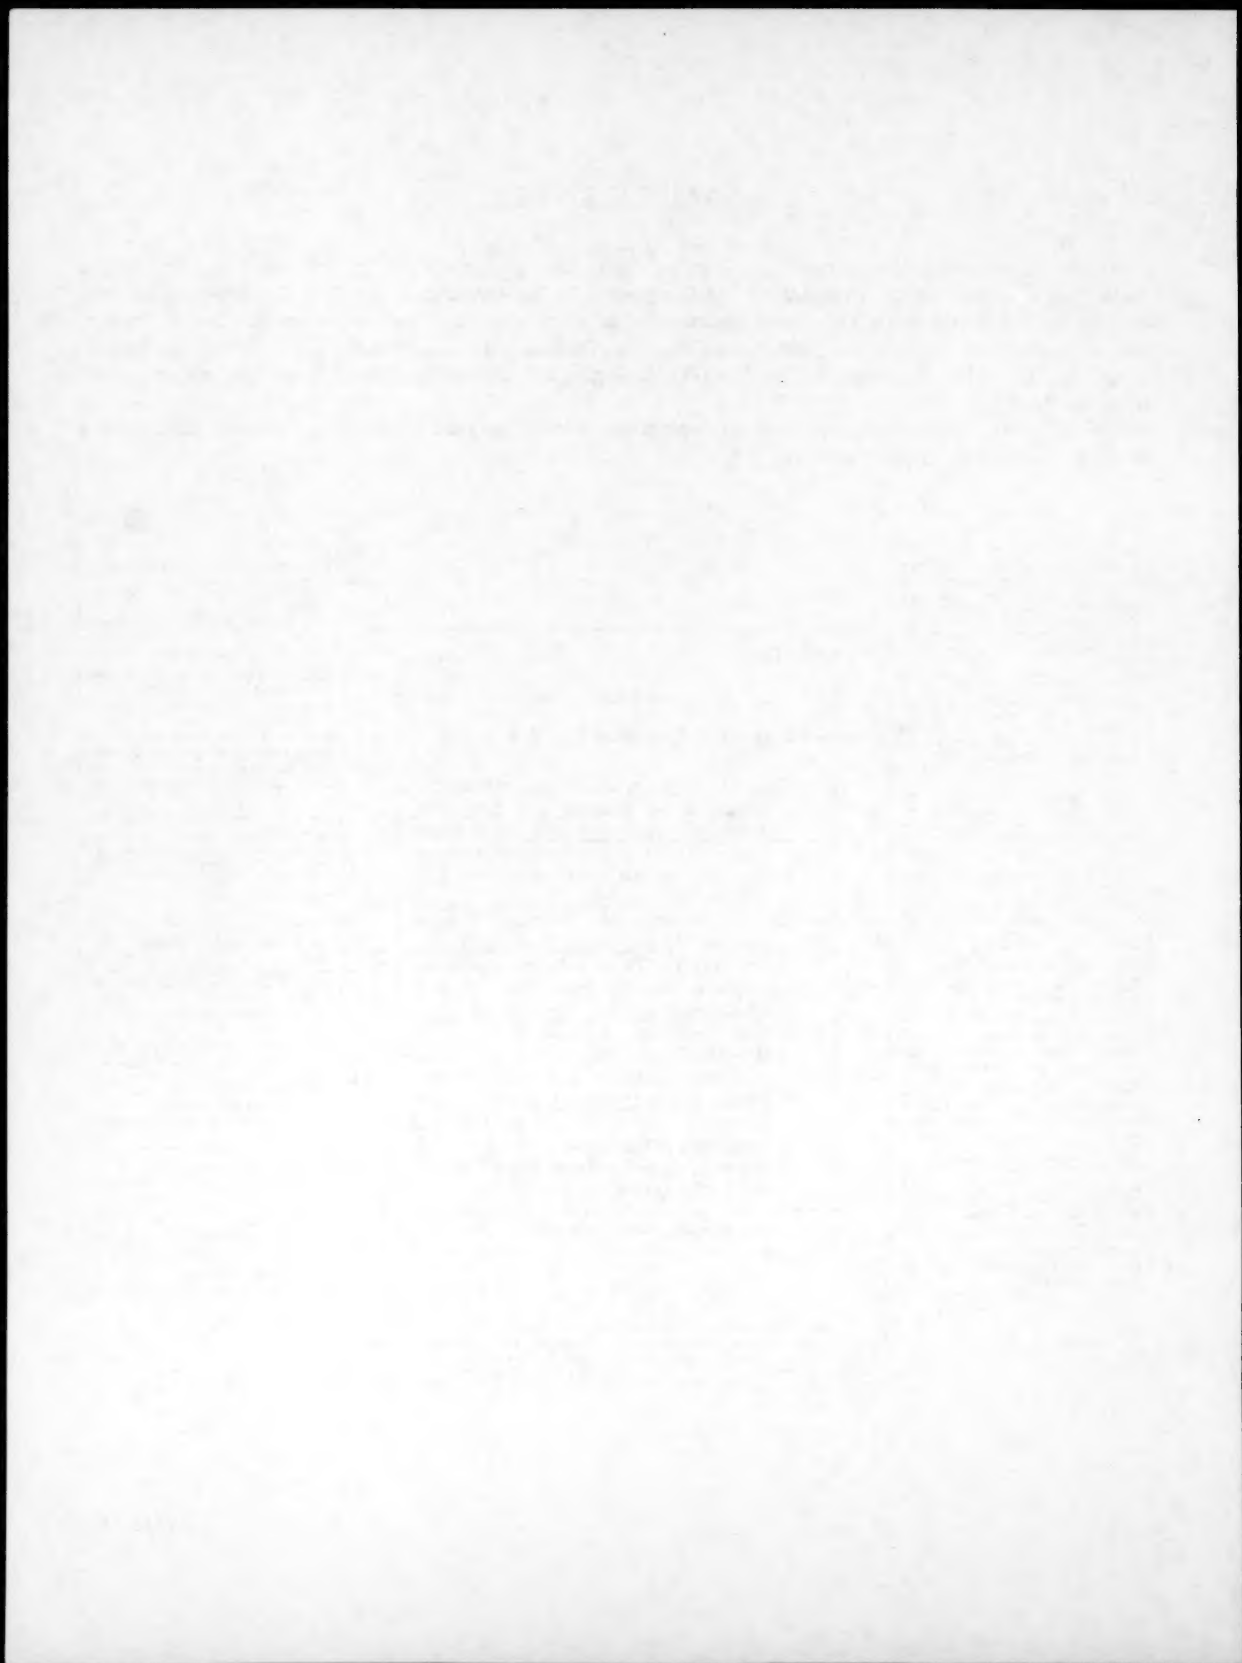

The thirteenth part of the paper is devoted to a study of the properties of the function $t(x)$ defined by the equation $t(x) = \sum_{n=0}^{\infty} m_n x^n$, where m_n are the coefficients of the power series. It is shown that $t(x)$ is a continuous function of x and that it satisfies the functional equation $t(x) = t(x^2) + x t(x)$.

SAMPLE ENTRY

Monthly Catalog descriptive cataloging entries follow the precepts of the *Anglo-American Cataloguing Rules*, 2nd ed., 1988 revision, the *Library of Congress Rule Interpretations*, the *GPO Cataloging Guidelines*, and the several pertinent OCLC format documents. All name and series authorities are in AACR2 format, and are established through the Library of Congress National Coordinated Cataloging Operations Project (NACO). The subject headings used in the GPO cataloging are derived from the *Library of Congress Subject Headings*, 14th ed.

The following sample entry is an artificial, composite record, designed to illustrate the major features of a *Monthly Catalog* bibliographic citation.

DOCUMENTS SALES INFORMATION

INTRODUCTION

The Superintendent of Documents of the U.S. Government Printing Office is authorized by law to sell copies of Government publications. The Superintendent of Documents currently sells more than 14,000 titles, which are just a small portion of the publications issued each year by the Federal Government. Prices for all U.S. Government publications sold by the Superintendent of Documents are established in accordance with Title 44 of the United States Code.

SOURCES OF INFORMATION ABOUT GPO SALES PUBLICATIONS

Publications Reference File—The GPO Sales Publications Reference File (PRF) is a catalog of all publications and subscription services currently for sale by the Superintendent of Documents. It is available in 48x microfiche and on machine-readable magnetic tape. The microfiche service consists of bimonthly mailings of the complete master file (approximately 175 to 225 fiche) and monthly mailings of a single fiche listing new sales publications. The magnetic tape service consists of biweekly mailings of the complete file. An annual subscription to the microfiche is \$115.00 (domestic) and \$143.75 (foreign). A subscription to the magnetic tapes is \$850.00 a year (domestic) or \$1,062.50 a year (foreign). To order either service, use the form in this catalog. Please enter the identifying letters PRF for the microfiche or GPRFT for the magnetic tapes in the ID column on the order form.

DIALOG and DIALORDER are computerized reference systems available from the DIALOG Information Service Inc. of Palo Alto, California. Information on all U.S. Government Printing Office sales items, subject bibliographies and catalogs listed on the Publications Reference File can be found through the DIALOG system. Subscribers to DIALOG can use it to determine if a publication is for sale by the Superintendent of Documents, if the item is in stock, and its stock number and current price.

An additional service, DIALORDER, is also available from DIALOG. Subscribers to DIALOG can place an order for publications with the U.S. Government Printing Office by computer at a special charge. For additional information on DIALOG/DIALORDER, please contact:

The *Out-of-Print GPO Sales Publications Reference File* provides users with access to historical records for publications which were once available through the Sales Program. Two 6-year cumulations have been produced. The first was published in 1980 and is known as the Exhausted GPO Sales Publications Reference File (EPRF). It includes 25,000 items which went out-of-print at GPO between 1972 and 1978. The second, known as the Out-of-Print PRF (OPRF), was published in 1986. It contains 35,000 titles which went out-of-print between 1979 and 1984. The EPRF and the OPRF continue to be supplemented each year. Supplements are sold annually and will cumulate until a third 6-year set is available in 1992.

Copies of publications listed on the EPRF and the OPRF may be found in regional depository library collections. Copies of certain technical publications no longer sold by the Superintendent of Documents may be available from:

National Technical Information Service
5285 Port Royal Road
Springfield, VA 22161

There are currently more than 230 *Subject Bibliographies* that list publications and subscriptions on a single subject or a specific field of interest. Each entry is listed by title and contains the GPO stock number and price. The bibliographies also provide a brief description of some of the publications and subscriptions listed, ordering information, and the date of imprint of a publication. The Superintendent of Documents has also prepared a *Subject Bibliography Index* to assist customers in selecting the subject bibliography that is most closely related to their needs. FEDERAL DEPOSITORY LIBRARY PROGRAM

The Federal Depository Library Program was established by Congress to provide free public access to Government publications. Nearly 1400 public, academic, State, and law libraries serve as an information link with the Federal Government by maintaining collections of Government publications. These collections, which are tailored to local needs, are open to the public. Fifty-three of the libraries are designated as regional depository libraries. They have the responsibility of retaining material permanently and providing inter-library loan and reference services in their regions. They also assist the other depository libraries with the disposal of obsolete material.

Copies of documents no longer available through the GPO Sales Program can usually be found in regional depository collections. A complete listing of regional depositories follows. To obtain a complete listing of all depository libraries, write to:
